Customized Apparel & Accessories

Embroidery and Decorated Apparel and Accessories are fast becoming the industry standard for dress down corporate apparel as well as an upscale addition to employee uniforms, sport team uniforms, and retail lines. Embroidery and Decorated Apparel offer endless possibilities for creative colors and designs, allowing casual clothing to be integrated with your personal identity.

Embroidery and Decorated Apparel and Accessories are making great gifts for family, friends, teams or businesses, as well as for fundraisers or for a host of other special occasions. Since we cater to the custom job, this means that there is no minimum buy, that we will accept orders for a single piece and that we will accept an order from anyone with their own apparel or accessories looking to have them embroidered. If you need a logo, we can help you design one that is guaranteed to be appealing to you.

Your custom logos or artwork can be produced at no charge or at a very affordable price. If there is a charge, it would be one-time fee and then the logo would be kept on file. The process of producing or reproducing your images is known as digitizing for embroidery. Digitizing is the transfer of your design into a language understandable to the embroidery machine. For heat transfer decorations, there is sometimes a modest artwork fee- akin to digitizing- to prepare the image for the decal machine.

Our delivery schedule is quick, usually no more than three days, regardless of the product ordered whether it is jacket, fleece, shirt, bag, etc. Same day service can often be provided to customers who call ahead or bring in their own apparel or accessories. Our shop is conveniently located in Middletown, Connecticut just minutes from either Route 9 or Main Street, Middletown. Anyone who is interested in custom or personalized wears is encouraged to visit our shop to see how easy, affordable and appealing customized outfits or accessories can be.
